Summary of The Capitol Coalition

The Capitol Coalition (TCC) is a not-for-profit organization that was founded on April 23, 2016 in Sacramento, California. Out of a genuine love for the community and a desire to provide unique opportunities for youth, the organization has grown organically over the years and offers a range of youth benefitting programs including virtual tutoring and cyber safety and security. TCC staff and board members understand that education is undeniable.

We would like to talk with you about the following SUSD approved services, in collaboration with our partner, University Instructors, Inc.:

DAYTIME INTERVENTIONS

Virtual Tutoring Support Features

tutorED™ is designed to increase student achievement and engagement and can be delivered in school or virtually. All tutorED™ programs are complete with design, planning, placement, training, management, and student reporting. We work collaboratively with teachers and school staff to develop strong partnerships designed to promote effective communication and shared goals.

EPIC® Out-of-School-Time Programming for Students & Families

EPIC® programs take an active and engaging approach to student-centered learning, offering additional learning and exposure to Math, English language arts and STEM. Instructional materials provide activity-based learning, are aligned to meet academic standards, and are supplementary to grade level curricula. EPIC® themes and modules are grade specific and are facilitated by program staff or district teachers hired to work with students at designated school campuses. All materials come pre-packaged, as activity kits, with necessary instructions and materials ready for immediate implementation.

Academic Benefits of EPIC® Programs

- EPIC® programs involve peer-assisted learning as an instructional strategy thereby providing students with increased opportunities for independence, teamwork, and collaboration.
- EPIC® programs employ instructional strategies that promote critical thinking while also allowing for creative strategies in problem solving, which encourage students to innovate rather than simply follow static rules.
- Flexible design allows for school leadership to establish the program modules, days, times, and duration that works best for their students.
